RE: Distributed Generator Interconnection – Permission to Operate
5MW Solar Generation Facility – NC14010 Schell Solar Farm
193 Hilltop Dr., Garysburg, North Carolina

Mr. Naftel,

Dominion has completed the review of your operational testing data and has concluded that the facility is currently meeting the technical requirements of your Interconnect Service Agreement. Based on this assessment, Dominion formally grants permission for the above referenced facility to operate in parallel with the Dominion North Carolina Electric Power System.

Please be aware that there may be occasions when Dominion may need to suspend operation of this generation facility in parallel with the Dominion System (reference Article 3.4 Temporary Disconnection of the NC Interconnection Agreement) and Dominion will strive to provide as much notice, of the events, as possible. For that reason, Dominion requests establishment and maintenance of a 24-hour-a-day, 7-day-a-week contact name and telephone number for this specific facility. Unless otherwise requested, this contact will both implement and confirm implementation of any requested action at a maximum of within one (1) hour of any such request.

Feel free to contact me if any questions arise, or contact our Eastern Region Operating Center @ 757-857-2720 to report any service problems.

Sincerely,

Donna H. Lynch
Transmission & Distribution Project Manager II
